## FL-618 Type Automatic Tube Slewing Machine For Belted Resistors

### Spec

Input Power: 110V/ 220V AC 60HZ/50HZ

Size: L1300\*W700\*H1400MM

Speed: 1500PCS/H

Weight: 300KG

Power: 200W

Air pressure: 4-6kg /cm<sup>2</sup>

### Features

- The machine is specially designed for tube slewing and forming of axial components including belted inductors or resistors, fuses, diodes, etc..
- A special vibrating disk is equipped to feed bulk resistors and tubular fuses automatically.

---

- The machine is used for the cutting, tube sleeving (coil of heat shrinkable tubes or Teflon tubes) and forming of belted components, tubes can be sleeved on pins or components as required, and K-shape forming is available.
- Specific forming dies can be used to form specific shapes, and length of sleeved tubes is adjustable.
- The machine is equipped with Mitsubishi PLC and touch screen for precise control.
- Separators position components precisely and several stations work cooperatively to finish the whole processes and get a higher qualified rate.
- The machine is widely used by factories producing power supplies based on its high stability and automation, and can substitute for 3 - 6 workers.
